DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to combinational collapsible table, classified in class 108, subclass 115.
- II. Claims 9-18, drawn to subcombinational saw track assembly for a saw table, classified in class 83, subclass 471.
- III. Claims 19-21, drawn to a subcombinational saw table, classified in class 144, subclass 286.1.
- IV. Claims 22-32, drawn to a subcombinational saw table with material support, classified in class 144, subclass 286.5.

The inventions are distinct, each from the other because of the following reasons:

Invention of Group I is separable and distinct as being drawn to a collapsible table.

Inventions of Groups II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention the inventions of Groups II, III and IV have separate utility and as such do not rely on the particulars of either Group for their operation. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; also because these inventions are distinct for the reasons given above and the searches required for Groups I-IV are not the

same, restriction for examination purposes as indicated is proper. Additionally, the inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
